Education

Pandit Deendayal Energy University — Gandhinagar, Gujarat
B.Tech in Electronics & Communication Engineering — *Class of 2027*

- **CGPA:** 8.64 / 10.0
- **Relevant Coursework:** Digital Signal Processing, Machine learning, Mixed Signal VLSI, Embedded Systems, Analog Electronics, Circuits & Systems, Analog Communications, Microprocessors & Microcontrollers.

Technical Skills

Simulation & Design: MATLAB, Simulink, LTspice, Tina-TI, Logisim, Proteus, KiCad, Fusion360
Programming: Python (NumPy, Matplotlib), C/C++ (AVR/ATmega), Assembly (8086)
Hardware: Raspberry Pi, Asus Tinker Board, AVR Microcontrollers (ATmega2560), 8086, Sensors
Tools & Conservation: QGIS, Adobe Lightroom, Data Visualization
Core Domains: Mixed-Signal Design, DSP, Audio Engineering, Embedded Systems
Soft Skills: Technical Documentation, Research Aptitude, Crisis Management, Project Documentation, Team Coordination

Experience

Research Intern — May 2026 – July 2026
Indian Institute of Science (IISc) – Dept. of Instrumentation & Applied Physics — *Bengaluru, Karnataka*

- Developed embedded firmware in C++ for an electronic pipette, implementing precision motion control, persistent calibration management, serial communication, and automated homing to enable accurate liquid handling.
- Engineered custom **PCBs** and modeled **3D-printed enclosures**, iterating on mechanical clearances, structural ergonomics, and component placement.
- Executed end-to-end electro-mechanical integration and optimization to improve fluid dispensing accuracy and device reliability.

Summer Intern — June 2024
Jivdaya Charitable Trust (Animal Welfare) — *Ahmedabad, Gujarat*

- Assisted in veterinary support and operational logistics for wildlife rehabilitation.
- Contributed to a **raptor research project** by processing clinical and behavioral data for analysis.
- Demonstrated effective crisis management and adaptability in a high-pressure field environment.

Projects

Minimoog-Inspired Polyphonic Digital Synthesizer | *C++, DSP, Embedded Systems* — 2026

- Developing a **polyphonic Virtual Analog (VA)** synthesis engine in C++, implementing an 8-voice allocation architecture and emulating non-linear transistor ladder filters for real-time embedded performance.

Design & Simulation of Delta-Sigma Modulator | *MATLAB, Simulink* — 2026

- Modeled a **2nd-order Delta-Sigma modulator** in Simulink to analyze noise-shaping for high-fidelity audio.
- Validated the system architecture and signal flow, analyzing trade-offs between Over-Sampling Ratio (OSR) and Signal-to-Noise Ratio (SNR).

MATLAB Innovation Challenge: Code the Future (Winner) | *MATLAB, Simulink* — 2025

- Led a team to develop an algorithm that determines the precise solar panel positioning for maximum possible output at any given location.
- Integrated complex multi-variable analysis including annual sun path, shadow casting, atmospheric conditions, and panel thermal properties.

Beam Steering & Antenna Array Optimization Tool | *MATLAB, DSP* — 2024

- Designed a simulation tool to visualize and optimize beamforming for antenna arrays.
- Implemented algorithms for phase shifting and array factor calculation; highly relevant for audio spatial applications.

Campus Navigation Tool | *QGIS, Web App* — 2023

- Mapped all university buildings using **QGIS** and deployed a web app accessible via QR codes stationed across campus.
- Implemented an autocomplete search feature, allowing users to instantly locate specific academic and administrative buildings.

Teaching Assistant Robot | *Asus Tinker Board, Arduino* 2019

- Collaborated to build a functional robot assistant; integrated **Asus Tinker Board** for Front end and **Arduino** for motor control.
- Designed the electronics subsystem, establishing early hands-on expertise in hardware integration.

Awards, Honors & Patents

Design Patent - High-Gain Fractal Antenna for Enhanced Wireless Communication 2025

First Place Winner - MATLAB Innovation Challenge: Code the Future (IEEE Hackathon) 2025

Semi-Finalist - Tata Club Energy National Quiz 2020

Leadership & Community

Wildlife Conservation & Citizen Science

- **GBBC Campus Organizer:** Coordinator for the Great Backyard Bird Count, managing volunteers and data compilation.
- **Field Researcher:** Participated in bird counts across Ahmedabad, Dholera, and Nalsarovar.
- **Conservation Photography:** Documenting local biodiversity through wildlife photography to support ecological awareness.
- **NSS Volunteer (2023-2024):** Active participant in the National Service Scheme community service initiatives.

Extracurricular Leadership

- **Committee Member, Sorriso (Photography Club):** Maintained visual archives and managed event documentation for **over 2 years**, ensuring comprehensive coverage of university activities.
- **Technical Committee, Brahmand (Space Club):** Collaborated within a team to build a dual-axis sun tracker; specifically responsible for integrating sensors and servo motor control logic.
- **Member, VGA (Cinema Club):** Managed event documentation and visual coverage for cultural events.
